Appendix G: Unduplicated Volunteer Calculator

Overview

Organizations applying for traditional RSVP projects or Senior Demonstration Program projects that have non-stipended volunteers must place at least one unduplicated volunteer in a workplan that results in National Performance Measure Outcomes for every $1,000 in AmeriCorps Seniors funding.

Common arithmetic rules should be used to determine how to round VSYs for outcome-based work plans. Applicants should round to the nearest whole number. For example, an AmeriCorps Seniors applicant with a non-stipended program requesting $105,425 in federal funding would require 105.4 unduplicated volunteers in work plans that result in national performance measure outcomes (105,425/1,000 =105.4). This would be rounded down to 105 unduplicated volunteers in work plans that result in national performance measure outcomes. Likewise, an applicant with $268,750 in federal funding (268.8 unduplicated volunteers in outcome-based work plans) would round up and require 269 unduplicated volunteers in work plans that result in national performance measures outcomes.

Unduplicated Volunteer Calculator

In the field below, enter the amount of AmeriCorps Seniors funding you are applying for. The number of unduplicated volunteers you have to place into outcome-based workplans for that amount of funding will be calculated for you.
